## Perennials

---

## TO OUR CUSTOMERS

We, at Springbrook Gardens, Inc. are in the process of changing from growing shrubs and perennials, to growing Perennials exclusively. We feel that in specializing we can produce an even better perennial than we have in the past.

Planting seasons are of necessity very short and we GREATLY APPRECIATE RECEIVING ORDERS IN ADVANCE, either for later shipment or to be called for. We ship promptly at planting time or on any date specified. All plants are carefully packed and should be removed from the box and planted without delay.

The prices named in this list cancel all previous lists.

**GUARANTEE.** We guarantee any plant we sell to be true to name and any Nursery stock that may prove untrue to name we will replace. If plants are received in good condition by the customer our responsibility ceases. We can not replace stock lost by causes over which we have no control. Claims for any cause must be made within five days after receipt of stock.

**SHIPPING.** Please give shipping instructions. If no instructions are given we will forward to the best of our judgment, without assuming responsibility. Plants become your property upon delivery to transportation company and we cannot be responsible for loss, damage or delay in transit. We ship Motor Freight only at customer's request and risk.

**PAYMENT IN FULL** should accompany all orders. Please send check, money order or bank draft. Currency should be sent only by registered mail.

We do not make C.O.D. shipments. If credit has not already been established with us, kindly send satisfactory references.

Your order will be acknowledged when received.

Visitors are welcome at all times

## ABOUT OUR PERENNIALS.....

The past year has found us buying - in many of the newer and better perennial plants to give you a more complete selection. Also the most modern and up-to-date methods of propagating, growing and spraying are being used effectively in our nursery.

In addition our catalog has been completely revised with you, our customers in mind. We now give you the answers to your most commonly asked questions, namely; COLOR, BLOOMING TIME, HEIGHT, GROWN IN SUN OR SHADE, whether it is a CUT FLOWER, and SOIL CONDITIONS. Our book also contains separate COLOR and HEIGHT GUIDES as well as a TABLE OF SPRAY recommendations. Refer to our index for these selections.

To avoid repetition in the catalog, we suggest here, a common sense rule on soil for perennial plantings. Use well drained soil, rich in Potash and Phosphorous (for root and stalk development) and moderately rich in nitrogen (to assure flowers, rather than over-developed leaves and stems).

With imagination most everything in our catalog can be planted in the perennial border as long as rules of likes and dislikes of the plants are observed.

**FALL PLANTING** is recommended only when planted early enough for the plant to become established. September 15th to October 15th is the ideal time for fall planting. To avoid heaving during winter a porous mulch should be used, such as soybean straw, pine needles or any coarse mulch which does not pack down or become soggy. Air must circulate. A mulch is used not to keep the plant from freezing, but to keep the already frozen plant from constantly freezing and thawing. The listed items are better planted in the fall.

ACONITUM, POPPY, PEONY, HELLEBORUS, CIMICIFUGA

**SPRING PLANTING** should be made as soon as possible in the spring. Your planting should be completed by the first of May. The following items are better planted in the spring:

JAPANESE ANEMONE, FUSCHIA, HELIANTHEMUM, NIEREMBERGIA, PENTSTEMON Firebird, PENTSTEMON Garnet, TRITOMA, LITHOSPERMUM, GEUM, CHRYSANTHEMUMS.

---

Items marked **FALL 1960** are either **NEW** or varieties low in stock because of severe winter damage.

# CONVERSION TABLE FROM 100 GALLONS TO 1 GALLON

	100 GALLONS	1 GALLON
Captan Wettable Powder	2 pounds	2 T
DDT 50% wettable powder	2 pounds	2 T
Ferbam 76%	2 pounds	2 T
Malathion 25% wettable powder	2 pounds	3 T
Miscible oil	3 gallons	½ cup
Wettable sulfur	1 pound	1 T
Tri-Basic	2 pounds	1½ T

## SPRAY RECOMMENDATIONS

Listed below is an all purpose spray which will control most chewing insects, sucking insects and fungus diseases.

### Amount per 100 gallons of water

2 pounds 25% Malathion per 100 gal. water

plus  
2 pounds 50% DDT per 100 gal. water

plus  
2 pounds 50% Captan per 100 gal. water  
(all above as wettable powder)

### Amount per 1 gallon of Spray

3 T 25% Malathion per 1 gallon water

plus  
2 T 50% DDT per 1 gallon water

plus  
2 T 50% Captan per 1 gallon water  
(all above as wettable powder)

APPLY: May 10-15th. June 1. July 1.

Supplementary treatments may have to be added for perfect results. See Table below. Follow directions of application pertaining to the spray you are using.

We have compiled this list of diseases and sprays for your convenience. Many of these sprays and dosages we use ourselves and others we got from reliable sources, but we cannot be responsible for injury resulting from the use of any of the spray material mentioned. For the most out of your spray, use a good spreader. Fungicides should be applied before rainy spells.

PEST	MATERIALS PER 100 GALLONS OF SPRAY	TIME
Anthracnose	(a) 2 lb. 76% Ferbam (b) 2 lb. Tri Basic	Every 10 days to two weeks.
Aphids black rosy green	2 lb. 25% Malathion	Before leaves begin to curl.
Beetles Japanese	2 lb. 50% DDT	When beetles appear, about July 1st, and repeat every 10 days.
Black Spot	(a) 2 lb. Captan 50W.P. (b) 2 lb. Tri-Basic	Apply once a week, before rain, or often enough to cover new growth.
Grubs (in soil) Japanese Beetle White Grubs European Chafer	2.50 lb. 10% DDT per acre 60 lb. 5% Dieldrin per acre 200 lb. 5% Chlordane per acre USE AS A DUST	1 to 2 months before planting on turf, early spring and fall.
Leafhoppers	2 lb. 50% DDT	Mid-June.
LEAF MINER	2 lb. 25% Malathion	Mid-May; again mid-June; again late summer.
Leaf Spot	(a) 2 lb. Captan 50W.P. (b) 3 lb. Tri-Basic	2 week intervals; before rain.
Mealy Bugs	2 lb. 25% Malathion	Late May; again early June.
Mildew	(a) ½ lb. 76% Ferbam plus 3 to 4 lb. wettable sulfur (b) Tri-Basic 2 lb. - 100 gallons	Once a week, before rain.
Red Spider (mite)	2 lb. 25% Malathion	Late May, before injury; repeat later if injury is severe.
Rust	1 lb. dry wettable sulfur	Weekly before rain.
Scales (early spring) Oyster shell Euonymous Cotoneaster San Jose	3 gallons dormant miscible oil	Early spring, avoid frost.

## OUR AIM

We believe that the best way to build a lasting and pleasant business is to produce the best plants possible and to sell them at a reasonable price.

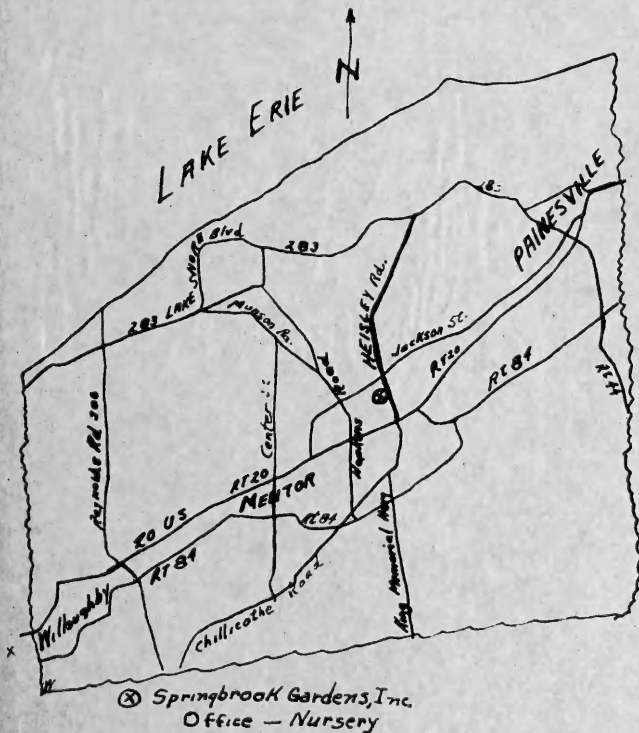

When you receive a shipment of plants from **SPRINGBROOK GARDENS, INC.** they will be carefully packed, all of an even grade of the very finest quality, freshly dug from the fields. Throughout the flowering period we go through our nursery removing any plant that is not true to name. At digging time when your order is filled, we use only plants which come up to our own exacting standards.

To maintain high standards, the income per acre is reduced but we know that prices must be reasonable to encourage larger plantings of our products. We depend a great deal on our customers recommending our products to others who are interested in flowering plants.

Your continued good will is essential to our continued success.

---

After Sept. 1, 1959 our new office will be located at the nursery on Heisley Rd., just  $\frac{1}{4}$  mile north of Route 20.
